

THE SCHOOL OF ADAPTIVE COMPUTER TRAINING

To enhance the computer technical skills and marketability of people with disabilities and others affected by the digital divide.

Customer Service Program Deliver Superior Customer Service

Class Description:

Students will receive training on delivering superior customer service. They will learn to develop an understanding of corporate culture and how excellent customer service enables organizations to achieve their company goals by contributing to real business growth. They will learn about strategies to build customer relationships, how to apply customer service skills to improve service, exceed customer expectations, and how to market additional products or services. In addition, the students will gain knowledge of business etiquette and professionalism.
