Putting accessibility on the map.
CPRF provides people with disabilities of all ages the customized services, support, and technology they need in order to facilitate their chosen personal and economic independence, with an emphasis on employment and training opportunities.

John F. “Jack” Jonas, Jr.
(1931-2014)
The Cerebral Palsy Research Foundation of Kansas and our affiliates, Center Industries Corporation and Business Technology Career Opportunities, continued to expand their capabilities by providing both support services and employment opportunities in 2018.

Among the many successes we have experienced this year, the mission to assist those with disabilities throughout the State of Kansas has grown significantly with the merger of United Cerebral Palsy of Kansas into CPRF. Expanding wheelchair seating clinic outreach, equipment purchase assistance, and new collaborations with multiple United Ways across the state will allow us to significantly broaden the reach of our mission.

As always, we are truly grateful for the extraordinary public and private sector partnerships we have developed over the years that assist us with our efforts to promote independence for Kansans with disabilities. In addition, I would like to thank our very talented Board of Directors, generous contributors, outstanding volunteers, and dedicated staff who works tirelessly to advance our mission.

God Bless those we work with, and we look forward to a very successful 2019.

Dan Carney
This year, we welcomed the addition of United Cerebral Palsy of Kansas into the CPRF family, allowing us to further expand our presence around the State, most notably with the administration of the Equipment Fund. The Fund provides assistance to individuals with disabilities and their families needing to purchase assistive technology and medical devices. Long-term partnerships with Kansas Rehabilitation Services, United Way of the Plains, United Ways around the State, and other community partners and foundations drive this program to be so successful.

Our Wheelchair & Posture Seating Program further expanded its outreach clinics to include Dodge City, which joins Liberal, Garden City, Hays, and Salina, to the list of areas where our clients and their families have easier access to services.

Several legislative initiatives to facilitate the employment of persons with disabilities have gained traction this year, and our support organizations, Center Industries Corporation and Business Technology Career Opportunities, have also solidified long-term agreements with our valued customers.

Renovations at the Timbers and a new transitional living program are also in the cards for the coming year.

All that being said, the valuable services and programs that we provide would not be possible without the tremendous support of our outstanding Board, volunteers, contributors, community partners, and a talented and dedicated staff.

To all involved with CPRF, I say thank you.

Pat Jonas
MEET OUR NEW BOARD MEMBERS

Dave Jones served as Executive Director of United Cerebral Palsy of Kansas for 39 years. Throughout his tenure, Dave assisted tens of thousands of Kansans with disabilities to procure assistive technology and medical equipment while providing guidance and resources to families who had a child with a disability. Dave also made a point to cultivate strong partnerships with several United Way agencies in Kansas so that UCP and CPRF could serve as many Kansans as possible, no matter where they live. Dave is beloved by families and colleagues throughout the state. We are happy that his vast knowledge (and truly legendary sense of humor) will be a part of CPRF’s future.

Dr. Timothy Koehler has been a long-time supporter of CPRF’s mission and is heavily involved in Wichita’s medical community. After obtaining an undergraduate degree from the University of Kansas, Dr. Koehler went on to attend medical school at the Oklahoma State University College of Osteopathic Medicine. Now a partner and family medicine practitioner at Northwest Family Physicians, Dr. Koehler’s medical knowledge and passion to care for others has led him to serve on the Board of Directors for the Guadalupe Clinic, a non-profit health clinic that provides medical care to those who are medically underserved in our community. We are grateful to have Dr. Koehler join CPRF’s Board of Directors, and we are glad that his knowledge, insight, and expertise will help guide us through these upcoming chapters.
RENOVATIONS
The Timbers apartment community, constructed in the 1980s, is about to get a remodel. As seating systems and technologies change, it is important that The Timbers remains accessible. In the above photo, architects set up a cardboard model of the proposed apartment design in order to receive feedback from Timbers residents and staff regarding its functionality.

NEW PROGRAM
CPRF will be starting a one-of-a-kind program: Transitional Housing. This program will be designed for young adults with disabilities who want to live independently, but need to build their self-care skill-sets. Participants will live independently in CPRF’s transitional housing for a period of a few weeks, during which time they will learn life skills such as bill paying, managing care, and more.

EQUIPMENT FUND
CPRF consolidated with United Cerebral Palsy of Kansas. This allows CPRF to provide more wrap-around services for those with disabilities around the state, in addition to the Wheelchair & Posture Seating Clinic. The Equipment Fund provides financial aid toward the purchase of assistive technology and/or medical equipment for individuals with disabilities.
Jessica is a fiercely independent 35-year-old from Parsons, KS. A naturally creative and outgoing person, Jessica runs her own craft business, selling hand-knit home goods at markets and local events.

Born with osteogenesis imperfecta, Jessica has been a client of the CPRF Wheelchair & Posture Seating Clinic since she was a young child and has used a wheelchair for safe, reliable, and comfortable mobility for decades. To her, this seating system is vital.

“It’s everything. It’s literally everything,” said Jessica. “This chair is essential to my life…my wellbeing. It makes me feel good, not isolated.”

Her hot pink chair is just like Jessica herself: unique and bright. It is tailored to her body to ensure she stays in a safe and secure position. It raises and lowers to suit various environments, and the cushions are molded to ensure she remains comfortable and that pressure points are alleviated.

Jessica relies on her chair in order to do the things she loves, whether that’s going to the movies, visiting her favorite downtown café, or even working.

“Anywhere I go, I have the best seat in the house.”
OUR PROGRAMS & SERVICES

Wheelchair & Posture Seating Clinic
Equipment Fund
School of Adaptive Computer Training
Adult Day Services
Case Management
Exercise & Wellness
Kansas Work Incentives Network
Job Placement
Vocational Assessment
Timbers Apartments & Transportation
Janitorial Services
Our Wheelchair & Posture Seating Clinic addresses the needs of nearly 800 adults and children with physical disabilities every year, building custom chairs that suit the needs and lifestyle of each individual. Designed to enhance comfort, provide better body alignment, and minimize the risk of pressure sores, our seating systems range from manual chairs to intricate power wheelchairs. Physical and occupational therapists are on staff to work with each client to ensure that we build the best seating system possible. All of our wheelchair seating systems are built in-house by technicians with decades of specialized experience. Technicians and therapists work together to ensure each client receives the best chair for their optimal mobility, comfort, and independence. Our partnerships and support from Sedgwick County, Kansas Department of Health and Environment Services for Children with Special Health Care Needs, United Way of the Plains, regional United Way organizations, and generous donations make it possible to offer the clinic as a valuable statewide resource for clients.

The CPRF Equipment Fund is a resource for people with disabilities throughout Kansas who need referral services, information, or financial assistance for medical devices and assistive technology. Through this program, CPRF creates funding packages for items such as power wheelchairs, van lifts, home modifications, video magnifiers, cranial molding helmets, ramps, lift chairs, and much more. Many assistive equipment devices can be costly and often present a financial hardship for individuals and families. CPRF’s partnerships and support from Sedgwick County, Kansas Rehabilitation Services, United Way of the Plains, regional United Way organizations, and generous donations to ensure our Kansas families receive the equipment they need.

The SACT is devoted to improving job-marketable skills for people with disabilities. In addition to our Microsoft-approved curriculum and Microsoft suite certifications, we offer courses in computing fundamentals and customer service. Our partnership with Workforce Alliance of South Central Kansas, USD 259, Mulvane School District, Haysville School District, and United Way of the Plains has allowed us to offer morning, afternoon, and summer classes for high school students with disabilities to learn valuable workplace skills and earn Microsoft certifications in Word and Excel while earning school credit. Since the program started in 2008, 363 students with disabilities have graduated from the program and 85% have passed at least one Microsoft Certification exam. Through July 2017, 80% of graduates responding had positive outcomes of obtaining employment and/or post-secondary education.
Marie wanted her four year old son Isaac to be fully engaged in his classroom, and his school therapist suggested that CPRF might be able to help purchase a mobility device he could use in class.

Through the combined efforts of CPRF’s Equipment Fund and Isaac’s preschool, he is now using a mobile prone stander in the classroom. This allows Isaac to interact with the world in a way that his developing brain wants and needs.

“He wants nothing more than to just move.”

The mobile prone stander has greatly expanded Isaac’s ability to learn interactively. He is able to move easily between preschool station activities, stand at eye level with his classmates, and participate in sensory activities.

Getting around in a whole new way has also allowed Isaac to become more socially outgoing. He loves music, and his prone stander has allowed him to be a part of circle time during group songs.

Marie is excited that Isaac will be able to continue to develop in an age appropriate way now that he can stand and move as he desires.
ADULT DAY SERVICES
Our Adult Day Services team ensures that each client’s individual needs are met every day. With amenities such as an accessible garden in our private courtyard, a wheelchair swing, sensory room, private swimming pool, community outings, and many other indoor learning and recreation opportunities, our clients have a variety of stimulating activities to choose from. We are able to offer these options thanks to the help of generous volunteers such as the Sedgwick County Master Gardeners, Wichita State University School of Music, United Way of the Plains, and many other community organizations. Caregivers can be confident that we provide their loved ones with excellent care.

CASE MANAGEMENT
Our case managers coordinate services for more than 100 individuals with disabilities each year, focusing on advocacy, service provision, resources, funding, and helping clients understand their rights and responsibilities. We also offer the WORK Program through the State of Kansas, which is a service for individuals with disabilities who want to work, but still need to receive their vital health and long-term care coverage.

EXERCISE & WELLNESS
The CPRF Exercise and Wellness Program promotes fitness for people with disabilities through strength training, improving flexibility, and pain-controlling exercises. Our Certified Restorative Aide works under the direction of an occupational therapist in our private gym on the Timbers campus. Our equipment includes parallel bars, standing frames, hand cycles, a para-gym, an elliptical, a cardio strider, and more. CPRF partners with United Way of the Plains and Sedgwick County to provide these services to those with disabilities in our area.

KANSAS WORK INCENTIVES NETWORK
KWIN provides Work Incentive Planning and Assistance services to Kansans with disabilities who want information about Social Security work incentives and community supports. In order to help people make informed employment decisions as they transition to and/or advance in employment, KWIN clients are offered guidance, benefit analysis, and a work incentive plan by Social Security Administration-certified Community Work Incentive Coordinators. KWIN is the only Work Incentive Planning and Assistance project in Kansas.
The CPRF Job Placement department guides people with various vocational barriers to the right position through resume development, mock interviews, and application and job search assistance. Through Ticket to Work, End-Dependence Kansas, and other programs, we work with people individually to ensure they find a job that suits their career goals and abilities. Community Based Job Tryouts are also available to ensure employee retention. Our staff further assists in the job hunt by educating clients on a potential employer’s expectations, changes in the job market since they were last employed, and what to expect from the jobs they seek.

Our Vocational Assessment team administers tests to measure aptitudes, skill levels, abilities, interests, work values, and more. The results generate a variety of potential careers and/or training programs that would suit the client. Our one-on-one approach ensures clients receive more precise employment recommendations, which can reduce job-related dissatisfaction and turnover rates.

The Timbers is a 100-unit apartment community for people with physical disabilities, featuring roll-in showers, roll-under sinks and counters, accessible switches, and more. In addition to these amenities, the Timbers also has three FEMA tornado shelters throughout the campus. Our wheelchair-friendly, open concept apartments and facilities make it possible for our residents to live life how they choose. Craft and book clubs, community guest speakers, and other engaging social activities allow residents to connect. Timber Lines Transportation provides wheelchair-accessible rides to help residents and community members keep medical appointments, go to work, and more. Timber Lines Transportation is supported by United Way of the Plains.

The Janitorial Services program allows CPRF to offer more integrated employment opportunities for people with disabilities. This program provides part-time and full-time work with competitive wages and health benefits in the porter and janitorial fields. Our services include: floor cleaning, trash removal, dusting, window cleaning, porter/matron services, and other routine cleaning duties. We offer flexible and reliable options tailored to the needs of any business.
Devonna received her first wheelchair from the Wheelchair & Posture Seating Clinic at two years old.

Now seven, Devonna relies on her lime green powerchair to keep up with her siblings, play sports, and enjoy the outdoors.

Devonna has muscular dystrophy, and having the ability to get around independently is a huge part of what makes her such a happy, active kid. Her mom, Ann, values the importance of her not needing to be carried or pushed in a manual wheelchair.

“She is free. I love watching her play her sports and just run around with the other kids with not a care in the world.”

Having the right chair to keep up with children as they grow is imperative to their health, safety, and comfort. Devonna relies on the Wheelchair & Posture Seating Clinic for repairs and maintenance to ensure her chair can keep up with her. She’ll even be getting a new power chair through the Clinic this summer.

*new in 2018
Assistive technology from CPRF is changing how Luke, who is visually impaired, experiences the world.

As Luke’s vision declined, the magnifying device he used for most of his day was putting strain on his eyes. The Braille Sense Polaris tablet allows Luke to receive and input information in braille. His school assignments can then be converted into emails that can be read and replied to by his teachers and classmates.

“There are many things the Braille Sense can do that we have just begun to explore... possibilities for improvements that we don’t even know about yet.”

Funding for assistive technology like Luke’s tablet is difficult to come by, but through CPRF’s Equipment Fund, Luke’s mom, Heather, was able to obtain the tablet. Heather is excited for Luke to be able to communicate independently in all areas of his life.

A Braille Sense Polaris (pictured) is a tablet that combines braille and mainstream Android apps.
The Peter John Loux Award provides an annual recognition gift to a Kansan who demonstrates exceptional desire and dedication in overcoming their disabilities. Any Kansas resident 18 years of age or older with a congenital or acquired physical or neurological disability may be nominated by another person or apply on their own behalf. Each Peter John Loux Award winner receives $1,000 and a commemorative plaque.

The award is an endowed gift established by the late Richard C. “Pete” Loux in memory of his son, Peter John. Mr. Loux, a lifelong advocate for people with disabilities, used his influence as the Kansas House of Representatives Minority Leader to help launch Center Industries Corporation in 1975. He also served on the CPRF Board of Directors from 1972-2004.

For more information about the Peter John Loux Award, contact Molly Tully at mtully@cprf.org.

Born with cerebral palsy, Erlena has used a wheelchair since kindergarten. Throughout the many challenges and losses life has presented her, Erlena’s mantra has been to maintain a positive attitude and in her words: “Just take it one day at a time”.

Erlena has been a dedicated employee at The Great Plains Nature Center for 22 years. She began her tenure as a volunteer, working 40 hours a week as a receptionist. Initially, her husband Jeff provided transportation for her to and from work. When Jeff passed away, her faithful companion and service dog, Yule, joined her on her morning commute as she continued to

“She is a joy to be around and is a person who has a seemingly endless reservoir of moxie and motivation to succeed in life. Her determination inspires others.”

–Chuck Weber, friend

Erlena Benning

“PETER JOHN LOUX AWARD WINNER

ERLENA BENNING”
make the trip to work each day in her wheelchair. She is there, rain or shine, and values being able to come to a job she loves. As someone who is always willing to help with special events or projects, Erlena has been invaluable to the nature center.

Being in a wheelchair for 20 hours at a time is part of Erlena’s daily routine. But the mobility her power chair has provided proves vital to Erlena’s independence in all aspects of life, not just traveling to work. If errands, appointments, or community events are located within a 4-5 mile distance, she’s known to enjoy making those trips on her own.

Erlena has experienced profound loss in her life, with the unexpected deaths of her husband and father within just a few months of each other. Both of these men were a great source of strength and support for Erlena. Her father taught her to live graciously and be thankful for the experiences and people she has met throughout life. The house that Erlena still lives independently in was built by her father. She and her husband opened their home over the years to several foreign exchange students, taking trips with them to attractions around the country. Some of these students still remain in touch with Erlena today.

Known for being involved her community, Erlena has been a part of the Big Brothers & Big Sisters program. She even attended college classes with a student from the program who was unable to write due to a disability. Erlena became the student’s “hands,” writing answers and taking notes for her in classes. Erlena is also active in Kansas Specialty Dog Services, traveling the state for events and providing classroom presentations with Yule.

According to those who nominated her, Erlena is an exceptional example of kindness, resilience, and ambition.

Surrounded by her family, friends, and the whole CPRF team, Erlena received a check and a commemorative plaque for $1,000 at an awards banquet.

“I am absolutely amazed at Erlena’s perseverance.”
- Marc Murrell, Director of the Great Plains Nature Center

“Erlena is one of the bravest people I know. Despite the fact that she’s spent her life in a wheelchair, she has gone tent camping and snow-skiing! When there’s something she wants to do, she tries really hard to figure out a way to do it.”
- Linda Thom, friend

“Erlena has developed a strength and fortitude that is quite remarkable and that I have not witnessed in any other person.”
- Kathy Corbitt, friend

Erlena has experienced profound loss in her life, with the unexpected deaths of her husband and father within just a few months of each other. Both of these men were a great source of strength and support for Erlena. Her father taught her to live graciously and be thankful for the
ABOUT THE JACK JONAS FOUNDER AWARDS

Jack Jonas, CPRF Founder, dedicated his life’s work to serving and advocating for an underrepresented population, creating an organization based around the principle that everyone, regardless of their physical abilities, has the right to an education, a career, and independence.

In honor of Jack’s legacy and spirit, CPRF established the Jack Jonas Founder Awards to recognize three employees per year who have shown dedication to the CPRF mission and who truly have a heart for those we serve.

The award winners are announced at CPRF’s annual holiday luncheon and receive a commemorative plaque and a check for $1,000 each.

*All CPRF, CIC, and BTCO employees are eligible for the award.*

CPRF  Aaron McAnarney, SACT Instructor

Since the Business Fundamentals for Youth Program began in 2008, Aaron has taught and mentored 363 high school students. Frequently going above and beyond in his efforts, Aaron is a major source of support for students, and their outcomes in the classroom. By developing his own practice exams for students, Aaron has been a driving force in the positive academic outcomes seen at CPRF’s School of Adaptive Computer Training. His practice exams have been vital in preparing students and building their confidence prior to final testing for Microsoft certifications. Aaron also makes it a point to remain in contact with as many students as possible to see where they’ve landed post-graduation, be it employment, post-secondary education, or military. Aaron equips his students with the technological knowledge and customer service skills they need in order to be competitive in today’s job market, going above and beyond to set students up for success.
Ten years ago, Steven Baxter started working in the Document Imaging Department at BTCO. His keen eye for perfection is undeniable, and it was the very reason he was selected to work in the Plot Center. Since moving to the Plot Center, Steven has trained almost all of his co-workers, becoming a great mentor and friend to everyone around him. He has gone above and beyond to not only train employees, but to also take initiative by helping out in other departments. He doesn’t just come to work to work – he genuinely cares about every task that takes place while he’s there, even after he has clocked out for the day. When given any task, Steven gives it 110%. His coworkers say that they never have to go back and check his work because they’re confident that it’s right. He has the patience to train and not judge others on their abilities. He is extremely appreciated by his coworkers and management alike.

Since Michelle began working at Center Industries, she has taken initiative in ways that have not only benefited those she works with, but the Wichita community as a whole. She has been instrumental in starting an annual blood drive, and encouraging participation in local fundraisers in the community. Earlier this year, several Center Industries employees joined Michelle in fundraising efforts and participation in an autism awareness walk. Within the company, Michelle has served as a human resources voice for employees in Building 7, located somewhat distant from the rest of the campus. She has worked tirelessly with management and staff in this area, ensuring a constant link between them and the rest of the company. She is an asset to Center Industries Corporation and beyond.
At only 9 years old, you could definitely say that Colette is a professional driver.

With only a few test drives in CPRF’s Wheelchair & Posture Seating Clinic gymnasium, Colette became a pro at driving her intricate, head array-controlled wheelchair system. Because using her extremities to control her wheelchair wasn’t feasible, CPRF OTs and fabrication technicians built Colette a chair with a head array system that allows her more control over her movements.

Her chair is also vital to her learning experience at school because it connects to a tablet that she uses to complete her schoolwork and engage in the classroom with her fellow students.

Her dad couldn’t be more thrilled with the amount of independence she now has.

“\textit{It’s given her the freedom to move about on her own and engage in the world on her own without having the need for assistance every second of the day.}”

THANK YOU

FOR YOUR GENEROUS SUPPORT OF OUR MISSION AND THOSE WE SERVE.
BTCO, INC.

BTCO has a motivated, skilled team of people, both with and without disabilities, working side-by-side and pooling their expertise to provide solutions in digital document imaging, mailroom operations, data services, and precision-tolerance plot printing.

A model of workforce integration success in both Wichita and Topeka, BTCO has created a powerful business model that measures its success by steady growth in workforce and customer satisfaction.

Having begun with a single contract in 2001, BTCO now boasts a wide range of customers, from rural school districts to universities, from local and state governments to commercial businesses, and more.

CENTER INDUSTRIES CORPORATION

Founded by CPRF in 1975, Center Industries Corporation employs approximately 280 people, with more than 75% of the direct labor hours being performed by people with disabilities.

Employees specialize in a wide range of manufacturing disciplines, including Boeing window belts, Kansas license plates, metal fabrication, CNC machining, printing, parts assembly, and more.

Using assistive technology, Center Industries prides itself on its ability to modify job stations for those with limited mobility.

By creating optimal options for productivity for all employees, CIC can contract with private and public industries on the same level as a traditional manufacturing company. Complementing CPRF’s mission, CIC employees are paid competitively with benefits.
